## Snapshot Report

CES 2006-454OR8

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

## **Overall Mathematics Results for Oregon**

- In 2005, the average scale score for eighth-grade students in Oregon was 282. This was not significantly different from¹ their average score in 2003 (281), and was higher than their average score in 1990 (271).
- Oregon's average score (282) in 2005 was higher than that of the Nation's public schools (278).
- Of the 52 states and other jurisdictions<sup>2</sup> that participated in the 2005 eighth-grade assessment, students' average scale scores in Oregon were higher than those in 23 jurisdictions, not significantly different from those in 21 jurisdictions, and lower than those in 7 jurisdictions.
- The percentage of students in Oregon who performed at or above the NAEP *Proficient* level was 34 percent in 2005. This percentage was not significantly different from that in 2003 (32 percent), and was greater than that in 1990 (21 percent).
- The percentage of students in Oregon who performed at or above the NAEP Basic level was 72 percent in 2005. This percentage was not significantly different from that in 2003 (70 percent), and was greater than that in 1990 (62 percent).

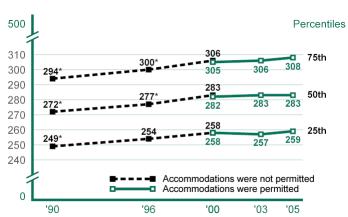

NOTE: The NAEP mathematics achievement levels correspond to the following scale points: Below *Basic*, 261 or lower; *Basic*, 262–298; *Proficient*, 299–332; *Advanced*, 333 or above.

Performance of NAEP Reporting Groups in Oregon						
Reporting groups	Percent of students	Average score	Percent below <i>Basic</i>	Percent of stud	lents at or above  Proficient	Percent Advanced
Male	52	284	27	73	35	9
Female	48	281	28	72	32	6
White	76	287	23	77	38	8
Black	3	258	50	50	9	1
Hispanic	13	257	56	44	10	1
Asian/Pacific Islander	4	299	18	82	50	19
American Indian/Alaska Native	2	274	37	63	23	6
Eligible for free/reduced-price school lunch	33↑	270	40	60	20	3
Not eligible for free/reduced-price school lunch	63	289	21	79	41	10

## **Average Score Gaps Between Selected Groups**

- In 2005, male students in Oregon had an average score that was not found to be significantly different from that of female students.
   In 1990, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 29 points. Data are not reported for Black students in 1990, because reporting standards were not met. Therefore, the performance gap data are not reported.
- In 2005, Hispanic students had an average score that was lower than that of White students by 30 points. This performance gap was wider than that of 1990 (16 points).
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 19 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 20 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 48 points. In 1990, the score gap between students at the 75th percentile and students at the 25th percentile was 45 points.

Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels of the distribution performed.

- # The estimate rounds to zero.
- \* Significantly different from 2005.

- ‡ Reporting standards not met.
- ↑ Significantly higher than 2003. ↓ Significantly lower than 2003.
- <sup>1</sup> Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities (3% nationally in 2005) and English language learners (1% nationally in 2005) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
- <sup>2</sup> "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassifed" category for race/ethnicity are not displayed.
